B3: base paths of prim_heap (colour) and kruskal (grey); solid = on the canonical opening; triangles = refined fork (filled = confirmed)
own-class share of 8 continuations
|O|+1
A3: base paths of two_pointers (colour) and prefix_suffix_max (grey); solid = on the canonical opening; triangles = refined fork (filled = confirmed)
own-class share of 8 continuations
|O|+1
B6: base paths of fixed_count_array (colour) and sort_compare (grey); solid = on the canonical opening; triangles = refined fork (filled = confirmed)
own-class share of 8 continuations
|O|+1
prefix length k (generated tokens forced from the base path)
