generate-then-select
semantic seed
cumulative ban x2
ban (instruct chat)
ban (decommitment twin)
decommitment direction, c=0.5
breadth direction
decommitment direction, c=0.375
novelty instruction
decommitment direction, c=0.25
random direction 1
enumeration prompt (temp/seed screen)
grid-task direction (cross-task transfer)
new-algorithm instruction
placebo (variable-name) direction
random direction, read-position only
random direction 2
enumeration prompt (decommitment twin)
