State probe matches the written text
(a)
Grid task: BFS vs DFS
Balanced accuracy
1.0
0.5
chance
read position
before commit token
after commit token
token 8
token 16
token 32
token 64
Position in generation
(b)
Shortest path task: Dijkstra vs Bellman-Ford/SPFA
chance
read position
before commit token
forking token
after commit token
token 8
token 16
token 32
token 64
Position in generation
Residual stream probe (best layer)
Within-paraphrase shuffled null, 95th percentile
Probe on written text
