Where each survivor family lands on four program frames
(a) Qwen3-32B primary (block 33)
(b) Qwen3-32B second (block 21) — gate fails
(c) Qwen3-32B programs only (block 31)
(d) Qwen3-8B primary (block 17)
g to the banned five
unit-weight Dijkstra (n = 15)
Bellman-Ford/SPFA (n = 15)
BFS variants (n = 3)
other known (n = 5)
Survivor classed edge
Survivor classed opposite
Frame median (edge / opposite cut)
Unit-weight Dijkstra reference program
IDA* reference program
