GRID decision site, block 16: handle coordinates (not certified). Stars = class centroids, size ~ implemented (passing BASE + SRC programs)
metric MDS of R_8 coordinates (stress-1 0.03)
Isomap (k = 8) of R_8 coordinates
PCA of raw block-16 states at d (var 0.63)
embedding axis 1 (a.u.)
embedding axis 2 (a.u.)
PC1 of raw residual states
PC2 of raw residual states
